EDUCATION

Anadolu University Expected: June 2027

Associate Degree in Information Technology (Web Development)

- Focusing on front-end architectures, modern web frameworks, and real-time application database systems.
- Completed comprehensive coursework in responsive web design, data structures, and client-side scripting.

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design

Backend & Databases: Firebase (Real-time Database, Authentication)

Development Tools & Editors: Open Code, Git, GitHub, Vercel

Specializations: E-Commerce Web Development, Dynamic User Dashboard Panels

PROJECTS

Haraco – Anime-Themed E-Commerce Platform

Front-end Developer

- Designed and deployed a highly responsive e-commerce web application specialized in anime-themed figures and accessories.
- Built custom, modular UI components utilizing React, HTML5, and CSS3 to deliver a seamless client shopping experience.
- Optimized site performance, SEO foundations, and delivery workflows with production deployments on Vercel.

Hair Art Mehmet Kalkan – Appointment & Admin Management System

Full-stack Developer

- Developed a complete professional appointment management web application for a local barber business.
- Integrated **Firebase Real-time Database** to instantly synchronize client booking slots and schedule states without page reloads.
- Designed and built a secure, restricted-access dashboard allowing administrative owners to fully track, update, and manipulate daily calendars.

LANGUAGES

- **Turkish:** Native
- **English:** Professional Working Proficiency (Sufficient for technical documentation and international development standards)
